SUMMARY

Over fifteen years of increasingly responsible and diversified experience in Information Technology, spanning Beta Program Management, Solutions Architecture & Development, Application & Network Security, Web Development & Administration, Systems & Network Administration, and Remote Access. Experience with standards development processes in both IETF and W3C working groups. Seeking positions in Beta or IT Management or web administration in the Worcester, MA area, or positions amenable to telecommuting.

EMPLOYMENT HISTORY

04/09-Present

COLOSPACE, INC., Somerville, MA

System Support Engineer

- Only third shift engineer, providing overnight customer & systems support for six data centers in MA & NH.
- Monitoring ColoSpace and customer servers & network infrastructure, responding to any alerts or incidents.
- Updating ColoSpace and customer device configurations, such as Cisco PIX & ASA firewalls & Cisco switches.
- Building out new systems, primarily Dell & HP x86 platforms running Windows 2k3/2k8 or CentOS Linux.
- Physically deploying systems into data center cabinets, wiring power & network, and configuring systems.

04/08-02/09

SLING MEDIA, Foster City, CA (Worked remotely from home in Worcester, MA)

Beta Program Manager

- Managed several high profile beta programs using [Centercode](#) beta management system:
 - SlingPlayer Mobile for Windows Mobile Standard (two updates)
 - SlingPlayer Mobile for Windows Mobile Professional (two updates)
 - SlingPlayer Mobile for Symbian S60 (update)
 - SlingPlayer Mobile for Symbian UIQ (new product)
 - SlingPlayer Mobile for BlackBerry (new product)
 - Slingbox PRO-HD (new product)
 - Assisted with other programs and general departmental duties.
 - Beta program management included selecting beta testers to fit program goals, creating program documentation and tester surveys, bug triage meetings with product managers and QA, acting as primary contact for beta communication, review of product documentation, feeding suggestions from testers to product team, etc.
- Primary corporate contact for third party community site [SlingCommunity.com](#).
- Primary corporate contact for tech blogs and online press, working with marketing department.
- Fielded most of the email communication addressed to the beta group, both internal and external.
- Representing Sling at the CES09 Sling & RIM booths, as well as speaking on behalf of Sling Media at [CNTRSTG](#).

11/02-03/08

CYPHERMINT, INC., Marlborough, MA

Director of IT Operations (11/05-03/08)

- Continuing to perform Senior Network & Systems Administrator duties.
- Hiring & supervising IT staff of three.
- Purchasing authority for corporate hardware and software requirements.
- Led effort to bring Cyphermint into compliance with software licenses.
- Led effort to bring all corporate desktops up to WinXP SP2 and MS Office 2003 as a minimum level.
- Migrated corporation to centralized anti-virus and anti-malware systems (AVG).
- Introduced centralized software asset tracking, auditing, and management (Track-It!).

Senior Network & Systems Administrator & Webmaster (04/05-11/05)

- Administration of corporate Windows and Linux servers, especially web servers and CVS server.
- Administration of network gear, including Cisco PIX firewall, load balancers, switches, etc.
- Maintenance of all corporate web pages based on designs and content created by Marketing.
- Evaluating software and vendors to suit corporate IT needs.
- IT support for corporate users.
